EDUCATION

Columbia University

New York, NY

Master of Science: Management Science & Engineering

Aug 2025 – Dec 2026

- Accepted to Startup Lab's Incubator and Accelerator (\$465M+ network), 3rd Place in *Fast Pitch* Competition (\$500 award).

HEC Montreal

Montreal, QC

Bachelor of Business Administration: Business Intelligence

Aug 2021 – May 2025

- Selected for *AGIR* (hands-on leadership curriculum) and *La Base Entrepreneuriale* (\$50K startup incubator) programs.

EXPERIENCE

Cloudflare

Austin, TX

Product Manager Intern

May – Aug 2026

- Driving more active users across Cloudflare's Bot Management products with engineering, agent experience, and design.

Scoutify

New York, NY

Co-Founder & CEO

Nov 2025 – Present

- Set product strategy from zero and led two engineers across research, design, growth, and monetization for an AI job-search platform; grew it to 1K weekly active users on iOS, Android, macOS, Windows, and web with no paid spend.
- Diagnosed that roughly 41% of paying users churned before first value; killed the paywall and rebuilt onboarding around activation, winning more sign-ups in the 20 days post-launch than the prior four months combined.
- Shipped "Sniper," an AI agent that auto-applies to jobs on companies' live hiring systems; 45K+ applications submitted to date, taking one user from 0 callbacks to 13 interviews.

CNN

New York, NY

Product Manager, Columbia Digital Product Management Lab (Practicum)

Jan – May 2026

- Defined an expert-analysis feature CNN was uniquely positioned to own, modeling seven-figure revenue uplift across acquisition and retention; owned the success metrics and exit criteria, and pitched to a CNN executive panel.

Votely

Brooklyn, NY

Founder

Apr 2025 – Present

- Owned Votely's political quiz end-to-end, co-developing it with the r/politicalcompass community through continuous user research; their feedback made it distinctive enough to earn 8.8K+ shares and organically grow past 40K users.

Slalom

Montreal, QC

Cloud Engineering Intern

May – Aug 2025

- Advised Slalom Canada's President on AI adoption for 1K employees, removing roadblocks to unlock \$7M in ROI.
- Engineered Terraform-based AWS cloud infrastructure, powering digital services for a 600K+ resident municipality.
- Led 12-person cross-functional team through Agile on-time delivery of a \$5M+ project, earning flawless client feedback.

McGill University

Montreal, QC

Research Assistant: Social Computing Lab

May 2024 – Apr 2025

- Re-engineered PyTorch training pipelines and optimized GPUs to train deep neural networks on a 1M+ image dataset.
